

5. College Event Registration Website – Responsive UI Design

Scenario:

A college is organizing a technical symposium and needs a website where students can view event information and register for events.

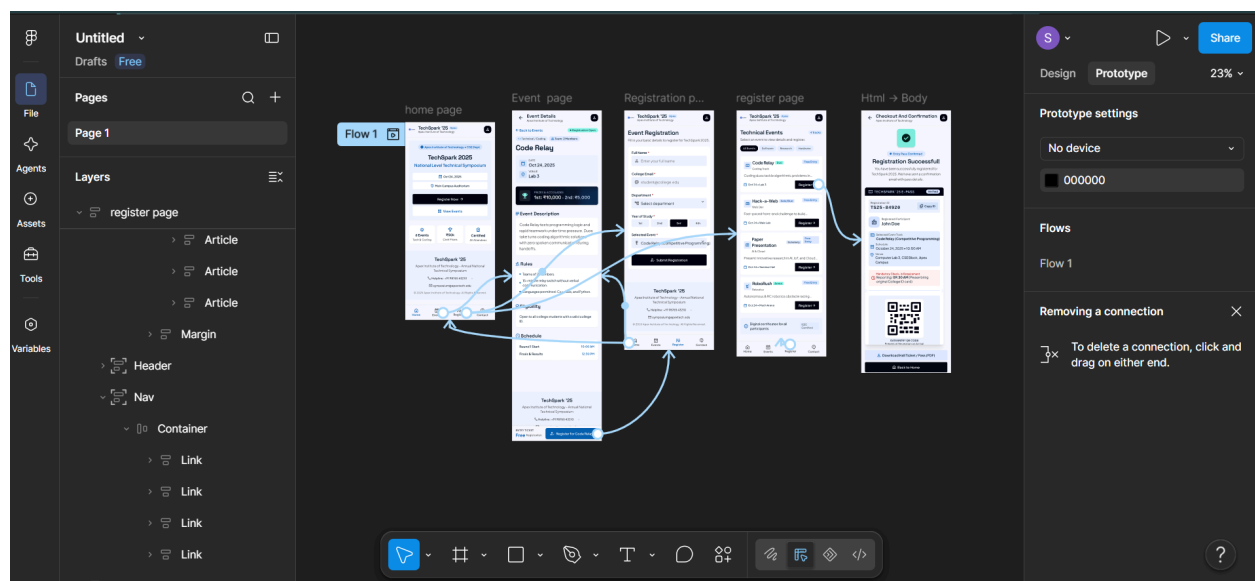

Question:

Using Figma, design a responsive website for the technical symposium containing:

1. Home Page – Event logo, navigation menu, event title, date, venue, and Register Now button.
2. Events Page – List of technical events with event name, description, date, and Register button.
3. Event Details Page – Event description, rules, eligibility, schedule, and registration option.
4. Registration Page – Student name, email, department, year, selected event, and Submit button.
5. Registration Confirmation Page – Registration ID, selected event, date, and confirmation message.

Figma requirements: Create both desktop and mobile layouts using responsive Auto Layout, Components, grids, and Prototype interactions. Demonstrate navigation from the Home Page → Events → Event Details → Registration → Confirmation.

Code Relay

DATEOct 24, 2025

VENUELab 3

PRIZES & ACCOLADES

1st: ₹10,000 - 2nd: ₹5,000

Event Description

Code Relay tests programming logic and rapid teamwork under time pressure. Duos take turns coding algorithmic solutions with zero spoken communication during handoffs.

Rules

- Teams of 2 members.
- 15-minute relay switch without verbal communication.
- Languages permitted: C++, Java, and Python.

Eligibility
