

2. College Student Attendance App – UI/UX Design

Scenario:

A college wants a mobile application that allows students to view their attendance percentage and attendance details for different subjects.

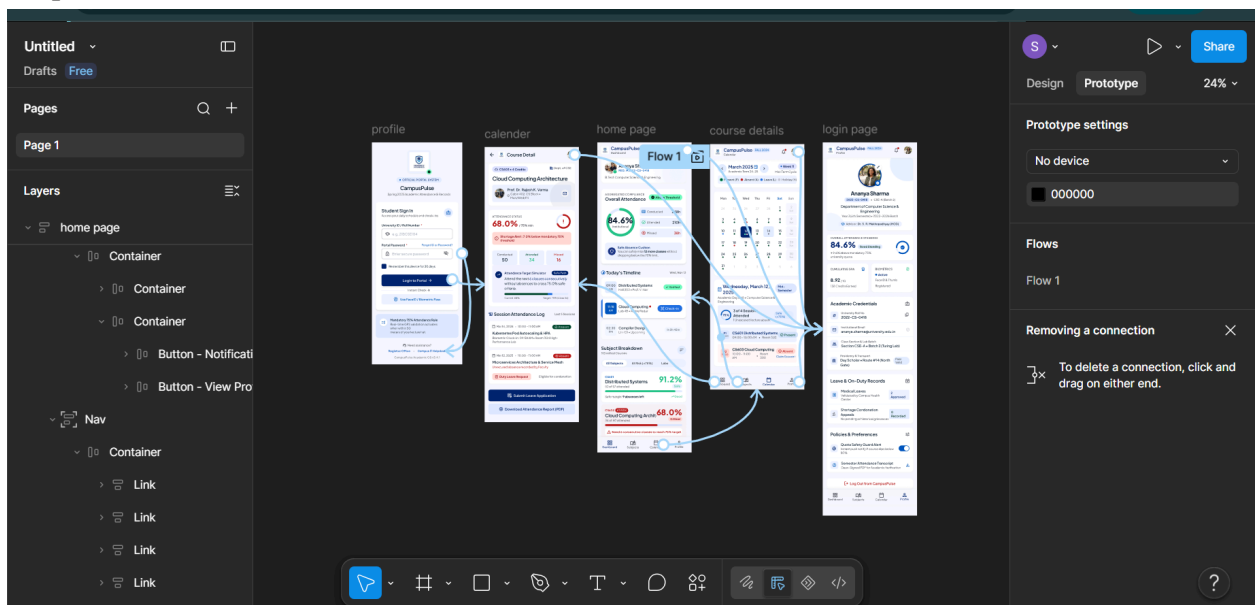

Question:

Using Figma, design a student attendance application containing:

1. Login Screen – Student ID, password, and Login button.
2. Dashboard – Student name, register number, overall attendance percentage, and subject summary.
3. Subject Details Screen – Subject name, classes conducted, classes attended, and attendance percentage.
4. Attendance Calendar – Display present, absent, and leave status for different dates.
5. Profile Screen – Student photo, name, department, year, and register number.

Figma requirements: Create reusable components for buttons and navigation elements, use Auto Layout, and create a clickable prototype connecting all screens.

Output:

UNIVERSITY
ACADEMY
